

WARMASTER GT

CLOCK RULES

We pride our event for its high level of play and also its high level of sportsmanship too. However we appreciate that with a game as complex as Warhammer 40000, especially played against the calibre of opponent that you'll find at the event you may need time to think and consider your moves carefully. You also have to ensure that both you and your opponent have that luxury of time and so we split the time evenly using a chess clock.

For our event:

- **The use of a chess clock is mandatory for all games.** There are multiple options for a physical clock, or apps - some of which are also used to score your games - that have a clock function. Whatever you are using then you must allow your opponent to also use it to swap time back to you. It is strongly recommended that you bring a clock that is easy to see who's time is being used.
- **Rounds at the Warmaster last 3 hours.** This includes time for you and your opponent to ensure that all objectives are in place, terrain is set correctly, and that you've ensured that your opponent is aware of any rules they need to know about your army - please see our sportsmanship section on that.
- **Once you have done this, take the time remaining in the round (you can find this on BCP), remove 5 minutes as a safeguard in case a referee needs to be called to the table to help resolve something that may require a pause to the clock briefly, and divide the remaining time between both players equally.**
 - An example: Neil and Tom are playing each other
 - After going to their table and setting up the game they have 2 hours and 50 minutes left.
 - They talk through each army and what it does to avoid any sportsmanship issues and to ensure a good game can be had by both players, there is 2 hours and 45 minutes left in the round.
 - They take 5 minutes off the round time and divide the time equally to both have 1 hour and 20 minutes to play. They then start the game normally.

During the game players are free to swap the clock back and forth so that the active player is using their time for their actions. Players are encouraged to discuss how they will handle these situations prior to starting the game, but you should be aware that when the game time is running low this is more likely to happen. **When doing so you should also ensure that the clock is switched back to your time** when this has finished, continued failure to do so may incur a penalty (see below). This will of course be for phases in their own turn but may also include, but not be limited to:

- Rolling armour saves or other things like Feel No Pain mechanics
- Removing casualties
- Time to consider use of a stratagem or ability
- Acting in another players phase such as close combat, interventions, reactionary abilities such as shoot on death and so on.

Both players are responsible for the time on the clock being correct. It is your shared responsibility to ensure that the clock is on the correct player at all times. **If you feel for any reason that the clock is being mismanaged by your opponent then you should call a referee immediately.** If a referee is not spoken to at the time, while the game is being played, we have no chance of resolving an issue.

Players have all the time on their clock to finish their game. While we would hope that the players have managed their time and do not need to play in a rushed fashion at any point, as long as a player has time left on a clock he can start a turn.

WARMASTER GT - CLOCK RULES

If a player's time reaches 0, they are unable to act. If they are in the middle of a turn they stop playing immediately. They may only make saving throws (not feel no pain rolls) and morale tests, may not fight back in combat, move, shoot, use command phase buffs, or any other action that would require the player to make a decision. That player must make all efforts to complete any rolls as quickly as they can so as not to use any additional time where possible, **failure to do so will incur a penalty - please see below.**

They may score objectives that they hold, as well as any secondaries that they are eligible to score as well. If an opponent decides to allow you to play on despite you having no time left this is at their own discretion and can be rescinded at any point without incurring a sportsmanship penalty. It is your obligation to complete your half of the game in a timely manner, not your opponents to let you spend more time than you have.

PENALTIES

These below penalties can range from an official warning to a red card and everything in between. These penalties are mostly to do with the mismanagement of the clock in an unsportsmanlike way and will be treated as a sportsmanship foul, and can therefore stack with other penalties that the player has received.

- **Failure to use the clock in a way that complies with our sportsmanship policies.** Attempting to use the clock as a weapon, not switching the clock back to you or your opponent in a timely fashion, perceived malicious use of the clock and other situations can carry a penalty depending on the severity of the situation. This also covers any player that has run out of time, and is still not playing in a timely fashion.
- **Players are not allowed to pause the clock at any time.** Pausing the clock may only be done by a referee if they feel it is necessary during a game. If a player pauses the clock at any time this is a foul. As well as any penalty applied the referee may adjust the clock to establish what they feel is the correct game state.

It is our aim to ensure that all games reach a natural conclusion, not to assign penalties to players and teams. Please ensure that for your sake you are clear on how these rules work, and ask any questions that you have to achieve a complete understanding of them.
